Chat from meeting 3

Chat from meeting

The following is the collected chat messages from the meeting where we discussed password management. It is pretty context free and there was no formal presentation to provide any of the reason for the comments. It is posted mostly to collect the links and some commentary on what we talked about.

19:05

---

kelly says: Environment Canada says 118 mm of rain was recorded at the Ottawa Airport on Wednesday, setting a record for the greatest rainfall on July 1 in Ottawa history. The previous rainfall record for July 1 in Ottawa was 58.9 mm, set in 1959.

The total comes second for all-time rainfall in Ottawa history, behind Sept. 9, 2004’s record of 135.4 mm, which was caused by remnants of Hurricane Frances.

19:17

Maiv says: Ideal length is 15 characters or more?

19:17

Scott says: https://xkcd.com/936/

19:25

Paul says: So… Do we know if Password Safe / pwsafe is actually safe? My famly relies on it.

19:27

Paul says: No clouds!

19:27

Scott says: i'm not going to recommend anything

19:28

Scott says: I'm not qualified

19:28

Paul says: (Not what was asked,

19:29

Scott says: I don't know. I have not used it

19:33

Marcelo says: Has anyone had experience with KeePass?

19:33

Tim says: I use keepassxc

19:33

Marcelo says: XC

19:34

Scott says: we have mentioned:

- bitwarden/vaultwarden
- passbolt
- keypass/keypassxc

and remotely accessibly locations

19:34

Tim says: ~local. I use it on NFS locally. Every now and then I push it to my NextCloud and a couple of other places so I can always retrieve.

19:35

Marcelo says: I have the blob on my local machine and have copy on my mobile.

19:35

James says: Since we are listing, I moved from lastpass to 1pass to RoboForm.

19:35

Scott says: add roboform to the list

19:45

Scott says:

- https://codeberg.org/pft/passage/
- https://youtu.be/joUIdxPOrZY?si=pchS5wR4BsIiSm6f/

19:50

Scott says:

- https://github.com/dyne/Tomb/

19:50

Tim says: What about estate planning and password management?

19:52

rgb says: @tim: that's why I'm here.

19:52

Paul says: I sent the key to my executor via signal messemger

---

19:53

Paul says: Foss: https://pwsafe.org/

19:54

James says: Question about 'estate planning', do you mean alternate people having access in case of unexpected disaster? That is why I use Roboform. If I become incapacitated, a specific person can request access, with a delay in case it is not warranted.

19:55

---

rgb says: the delay thing is an interesting addition. there are x of y key schemes out there where no one person has the whole key.

19:55

Katie says: IPTC?

19:55

Tim says: Yes. Incapacitation == death. I'm wondering about something like multi-sig like bitcoin (or is it Eth?) Prefer something that requires multiple trusted parties.

19:57

Paul says: Send pieces of a passphrase

19:57

James says: multiple people with different parts of your master key?

19:58

rgb says: @james yes

19:59

nashjc says:
https://stackoverflow.com/questions/67616467/why-cant-chrome-read-local-html-file-on-android

20:03

Katie says: UN

20:07

nashjc says: https://en.wikipedia.org/wiki/IPTC_Information_Interchange_Model

20:07

nashjc says: https://en.wikipedia.org/wiki/IPTC_Information_Interchange_Model

20:13

Scott says: @JF - have you seen this?
https://www.reddit.com/r/linux4noobs/comments/1t7qk2j/new_to_linux_pc_will_not_completely_shutdown_or/

20:14

Paul says: https://bestreviews.net/which-password-managers-have-been-hacked/

20:17

Tim says: @jf - clonezilla should be able to export the image of your NVME to a file on a network. ... and it will not be 1 TB.

20:18

Katie says: John, there is a conference dedicated to IPTC:
https://iptc.org/events/photo-metadata-conference-2025/

20:26

Maiv says:

20:26

Jila says: thanks and good night
