August Meeting: Using browsers securely

Date: August 6, 2015 at 6:30 p.m.
Location: Rosemount Branch, Ottawa Public Library

This month we will be having a open discussion on various browsers and some of the methods, plugins and/or built-in ways to be a little more secure online.

Pre-meeting:

There will be a one hour pre-meeting item from 17:30 to 18:30 for people who are new to Linux, have general questions, or wish to help out with people who are just getting started.

After Meeting Social:

After the meeting, there will be a social event at one of the nearby pubs or restaurants. A short discussion and vote as to location will be taken then.

GPG Keysigning:

After the main talk there will be the opportunity for a GPG key signing. This is a monthly offering, just look for Scott after the talk and we can go from there. Bring some kind of photo ID and some keyslips if you expect people to sign your key.If you need some method of creating pages of keyslips, there is an online slip generator available.

Browser security

Speaker: various

What are the best browsing practices today? What browsers are more secure? What plug-ins offer a better or more private experience? Come out and participate in this open discussion. Bring your questions or solutions and tips. If you use a non-mainstream browser, tell us about it and why you use it.
