Thursday November 5, 2020

Venue

Linux-Ottawa Jitsi Server

As this server is being built about an half an hour prior to the meeting to keep the operating cost down, there should be no connectivity until roughly 30 minutes prior to the meeting. Access codes follow a simple predictable pattern and you can find the pattern in the mailing list.

Meeting Agenda

When: Thursday, November 5, 2020
Time: 19:00
Where: jitsi video conference (details below)

As per our new normal, we will utilize jitsi for our meeting.

This month we have three short talks on the topic of e-voting.

1. The first will be from John on e-voting systems thenselves.
2. The second from Scott on experiences with a specific evoting system.
3. The third will be from Tug on open vs. closed source e-voting systems.

Discussion and questions welcome.

As a reminder, we have scheduled a scripting talk for the December meeting for the past couple of years and we intend to continue the tradition, so if anyone is interested in doing a short ~5 minute talk on some scripting aspect, feel free to let the secretary (<secretary> at <linux-ottawa.org>) know that you are interested so we can line them up.

It can be about anything, something new you have discovered, a problem you are having, etc.

Meeting Details:

The meeting URL will now be a fixed URL, https://six.linux-ottawa.org and should be up for connection by 18:30 on meeting nights. The codewords that you need will also be predictable so that you no longer need the email with them to join. Hopefully you are on the mailing list so you will know the pattern.

Rules/Procedures/Common-Sense:

Similar to last time, your output video and audio will be disabled when you join. In order to make sure the experience is a reasonable one for all involved, the presenter will share their screen-window-whatever they are comfortable with and you will see it quite clearly. Rather than unmute, pressing your space bar is supposed to unmute your microphone while pressed, so you can try that to ask questions. There is also the chat window, but when it is active it obscures part of the screen. Feel free to post questions and as

opportunity presents itself and the presenter notices, they will get answered. After the presentation is completed, feel free to unmute and have a normal voice/video Q&A.
