Program:

Topics

1. Dianne Skoll will give her “Introduction to Mailmunge” presentation

Mailmunge is a framework for writing email filters in Perl. It interfaces to both Postfix and Sendmail using the Milter API; this lets you perform filtering during the SMTP session and modify responses to SMTP commands. This talk will provide an overview of Mailmunge as well as a look at the Mailmunge filter currently implemented on the Linux-Ottawa mailing list.

Mailmunge is found at https://www.mailmunge.org/
