Linux-Ottawa July 2026 Meeting.

Date/Time:

Thursday July 2nd at 7pm

Format:

1. Online over Jitsi https://meet.jit.si/oclug_2026-07-02_meeting
2. Check the mailing list for in-person clusters being hosted by other members.

Program:

Topics

- Password storage - Scott has a little discussion on the topic.
    - Recently, we discussed authentication systems. We also have a similar issue with the necessity of managing more passwords than humans should have to handle.
        - Self hosted password management is a thing.
        - Using someone else's service is an option, however we have seen multiple problems with that in recent history.
        - Zero knowledge cloud services are available. Do we trust them?
        - I like the idea of hosting my own vault and there are a few options that come to mind.
        - I saw a short video on one such tool and I thought it was interesting. I'd like to bring that one up as an example and maybe discuss the possible flaws in it.
