Committee Reports

New to Linux (New Users)

Scott: We had three new people asking questions. I was engaged for a while and then had to beg off in order to greet people and talk about the election. Bruce took over for a while. Bruce could probably expand on the discussion. The portion I remember was him wanting to build a distro from the ground up. I think I mentioned Gentoo at that point as a method of achieving success rather than starting with compiling a boot loader and a kernel and building from there. Linux from Scratch I believe. Tug arrived somewhere around then and had something to say about Gentoo.

We also discovered we were sharing the room with the Algonquin folks, as that had not been mentioned to me. Good thing I didn't try to eject people.

L3GO (Low Level Linux Group)

I saw an email attempt to be delivered to L3GO from RGB last week, so I guess that there was a meeting?

IanG:

- not at meeting

OCLUG Customized Bunsen Labs Distro Project Update

John:

- Aimed towards learning more than something for production
- Wants to encourage participation in the project
- Looking into ways of remastering the instance
- still ongoing

Treasurer's Report

Ian:

- not it meeting but the balance is unlikely to have changed

AGM 2018 Commentary

- We had 22 people on the list, so we made the numbers. We do not need to do that again in May.
- Perhaps we should make the required attendance a little lower, like 15 people? Lower the bar so we can make this happen without having to look for proxies.
- We have two new board members:
  - Tug Williams
  - Ed Hong
- The secretary needs to get personal information from the new members for the purposes of the corporate paperwork.

Mailing List Rework

- The new list in active and delivers email I have not yet got the archive online. That may be changed by the time we look at this on Sunday.
- I have all of the old list archives, and they will be added.
- L3GO is also hosted on the new server. Same ideas as for the Linux list.

The list of repeating sessions

One of the things we discussed with the old board was a series of talks we do every year, mostly as a touchstone showing what has changed or stayed the same. The list of talks we have had are:

From this list, we need a few items to repeat annually. Suggestions are:

- Outreach - to introduce more people to Linux ** work arounds ** equivalencies ** who are the target audiences? *** People who want server/websites *** People who want home/office based servers *** People who want to run a family/community server *** People who want alternatives to Facebook ** Workshops for the public?
- Distro talk
- Scripting
- Lighting Talk night - Ignite format

Planned Regular Meetings

Virtualizing old hardware.

Speaker:

Tug

Topic:

Controversial Topic (Short topic)?

June

Speaker:

John Nash

Topic:

Desiderata for interfaces, CLI or GUI

Speaker:

Topic:

July

Speaker:

Scott

Topic:

Practical demo of Let's Encrypt

Speaker:

Topic:

Linux in the Wild

- Same as last year I would think. Location: Strathcona Park Date: Second Sunday on July @ 13:00

List of possible topics

This is a live wish list. It should grow and shrink with the topics we come up with. It is good to have a reference so we don’t lose possible topics. Feel free to add to the list. [X] indicates we did this one.

- Use the update of the wiki as fodder for discussion? [X]
- Blogging
- Tools for making graphics in a productive fashion
- Ditaa as a possible options
- Mermaid as a possible options
- GraphViz
- Dia

- Even raw SVG production might be of interest.
- Node.js
- MongoDB
- Arduino Talk (Peter S)
- AngularJS & VScode
- Platform independency for application users: Why doesn’t my program work on my computer? [X]
- MicroVAX (will be a topic after Scott gets it all working)
- HW seems OK now that motherboard has been replaced
- Procuring an additional one that might allow me to figure out the remaining issues
- Issue getting the console working properly
- New (to me) VAX is on the way (I have it, still in the box)
- PDP8 emulator & PiDP8 Hardware Panel (More of a short talk) ** Scott Murphy (when completed)
- Obsolete telephone reuse ** Scott Murphy (has a project in the works) (getting back to that)
- Need to get back to this
- Virtual Box and Docker integration
- Have done a few things with this. Need to put together something
- Virtualizing a Physical machine remotely, using old tools for new tricks. ** Scott Murphy - I managed to virtualize Tux by screwing around with the hard disk to get enough space to create locations to do a backup. This could even be done over dialup if necessary. All CLI, all using existing Linux tools, no reboot necessary. This will be my May 2018 talk
- Grace Hopper Memorial evening - Stories of Bugs
- Hardware Show and Tell
- Backup Software
- Privacy and Security

New business:

- Possibility of video presentations from non-local speakers
- Pi Day (of the Raspberry variety)
- Possibility of a 1 article per year on the wiki for each member

Adjournment:

- Motioned: Kelly
- Seconded: Ed
