Libreoffice and more

February Meeting: Libreoffice and more

Date: February 4, 2016 at 7 p.m.
Location: Algonquin College (Woodroffe Campus), room B185

Note This meeting is at the Woodroff campus of Algonquin in Building T, **room T-303 at 7:00pm**

This month we will be having a talk on libreoffice, one on open data with ipython notebooks and maybe a third, unknown at present. If any others come in over the next few days, this post will be updated to reflect the new information.

Pre-meeting:

There will be a one hour pre-meeting item from 18:00 to 19:00 for people who are new to Linux, have general questions, or wish to help out with people who are just getting started.

After Meeting Social:

After the meeting, there will be a social event at one of the nearby pubs or restaurants. A short discussion and vote as to location will be taken then.

GPG Keysigning:

After the main talk there will be the opportunity for a GPG key signing. This is a monthly offering, just look for Scott after the talk and we can go from there. Bring some kind of photo ID and some keyslips if you expect people to sign your key.If you need some method of creating pages of keyslips, there is an online slip generator available.

LibreOffice Master Documents

Speaker: Aaron Wilcox

This will be a short talk on composite document creation

iPython notebooks, open data and pandas

Speaker: Scott Murphy

A brief look at iPython notebooks and some of the things you can do with them. Similar to using KnitR

About the Speaker

Scott has been haunting server rooms and using/administrating Unix and Unix like systems for more than 30 years now. His background includes IT infrastructure, system administration, deployments and migrations, security and management. He is currently working as a consultant for the federal government.
