Logging

pre-move system used:

- syslogd
 - The contents of /etc/syslog.conf is identical
- logrotate
 - The contents of /etc/syslog.conf is identical
 - The contents of /etc/logrotate.d is not identical, but is close enough. Needs reviewing after the move to be sure the log rotations are occurring properly.

When we go live:

- Systems that need special attention are:
 - apache2 (new to new system)
 - clamav-freshclam (the clamav-freshclam package is a different version)
 - mysql-server (mysql not installed on new system)
 - syslog-ng.disabled (new to new system)
