2016 Meeting Presentation Notes

January

Scott Murphy: Ansible Introduction - A very basic introduction oclug-20160114.pdf

February

Scott Murphy: IPython Notebooks, etc. oclug-20160204.pdf oclug-20160204_notebook.tgz

March

John Nash: ***Scanning and Saving a Collection of Documents: The Joys and Woes of Details*** nash-scan-oclug160303.pdf nash-scan-oclug160303.pdf

Scott Murphy: (slides will be posted in late April)

John Nash: Comments on unexpected behaviour of **pandoc** – this is still unresolved. nash-pandoc-160303.pdf

April

No formal presentation, Alex had a free form talk with a couple of simple diagrams on the whiteboard.

May

Scott Murphy: Presentation Frustrations - sample printout:scott-oclug-20160505.pdf - gzipped html version:scott-oclug-20160505.html.gz

June

July

Ian Gorman: RaspberryPi Blackbox :raspberrypiblackbox.pdf

Scott Murphy: Dashing Briefly :scott-oclug-20160707.html.gz

August

John Nash: Cleanup of file collections – review and rethink Nash-file_cleanup_160804

rmaiib.pl zipped

September

October

November

Scott Murphy – a Raspberry Pi cluster

John Nash – Proposal for an OCLUG liveUSB

A live-USB toolkit?

Post-meeting notes:

- During the meeting, Alex Pilon suggested that a liveUSB could be booted in VirtualBox, but we had trouble doing this. I (JN) tried again the next day, with no success, despite giving myself ownership of the /dev/sdc device where the liveUSB was attached. However, qemu was able to boot a (32bit) CrunchBang Waldorf liveUSB, but not my (64bit) 2016 DanceBox. Dmitriy Korovkin emailed me that he had managed to boot CorePlus-7.2.iso after putting it on a USB, but not Ubuntu 16.04. So booting a liveUSB in a virtual environment may be a “sometimes” possibility. It would be nice to figure out the reasons and conditions.
