December

December returns our “Scripting Night”

[Scott Murphy:](#)

Scripting: Bashing IoT

John Nash: A small update to rmaiib.pl (Remove from A If In B) to trap B==(symlink) which causes a crash of the Perl script. This was illustrated with an iconized version in Double Commander, and the change shown using a similar iconized tool to display files side by side using Meld. Brenda Butler posed a question about the possibility that Meld could Undo line transfer operations. Answer: Yes, but Undo is only possibly in reverse order of the original actions, and Save will clear the Undo stack.

Ian Gorman: Use of scripts in Bash, Python and R to measure network speed for NCF
