The Trac User and Administration Guide

[TracGuideToc]

The TracGuide is meant to serve as a starting point for all documentation regarding Trac usage and development. The guide is a free document, a collaborative effort, and a part of the Trac Project itself.

Table of Contents

Currently available documentation:

- TracGuide (This page) – Documentation starting point.
  - TracInstall – How to install and run Trac.
  - TracUpgrade – How to upgrade existing installations.
  - TracAdmin – Administrating a Trac project.
  - TracImport – Importing tickets from other bug databases.
  - TracIni – Trac configuration file reference.
  - TracPermissions – Access control and permissions.
  - TracInterfaceCustomization – Customizing the Trac interface.
  - TracPlugins – Installing and managing Trac extensions.
  - TracWiki – How to use the built-in Wiki.
  - TracBrowser – Browsing source code with Trac.
  - TracChangeset – Viewing changes to source code.
  - TracTickets – Using the issue tracker.
  - TracReports – Writing and using reports.
  - TracQuery – Executing custom ticket queries.
  - TracRoadmap – The roadmap helps tracking project progress.
  - TracTimeline – The timeline provides a historic perspective on a project.
  - TracLogging – The Trac logging facility.
  - TracRss – RSS content syndication in Trac.
  - TracNotification – Email notification.
- Trac FAQ - A collection of Frequently Asked Questions (on the project website)

Support and Other Sources of Information

If you are looking for a good place to ask a question about Trac, look no further than the MailingList. It provides a friendly environment to discuss openly among Trac users and developers.

See also the TracSupport page for more information resources.
